The Foundation of Smarter Supplier Management

Unified Supplier Data

Centralize and standardize supplier information into a Trusted Golden Record, the verified data foundation that makes AI in procurement actually work.

Automated Workflows for Risk & Compliance Management

Streamline risk management and regulatory compliance with built-in automation that enforces policy consistently and keeps every record audit-ready.

Integrated Risk Intelligence

Integrate ESG, financial, geopolitical, and other licensed data into automated workflows that surface the right risk signals in the context of your actual spend and supplier relationships.

AI-Native Supplier Management from Discovery to Optimization

- ✓ **Discover, Request, and Verify Suppliers**
Effortlessly find and request trusted suppliers, with seamless verification to ensure thorough risk assessments on the right partners.
- ✓ **Assess Risk and Onboard Efficiently**
Standardized workflows streamline onboarding while integrating risk intelligence from day one.
- ✓ **Automate Risk Monitoring**
Continuous risk tracking ensures proactive mitigation and compliance
- ✓ **Simplify Compliance Management**
Reduce regulatory complexity with automated workflows and standardized questionnaires.
- ✓ **Drive AI-Native Decision Intelligence**
Turn verified supplier data into contextual risk intelligence so your team knows not just that a supplier is risky, but whether that risk actually matters to your business.
