

# Trust Your Supplier

## Building Resilient & Compliant Supply Chains for the **ENERGY & UTILITY SECTORS**

Utility and energy companies operate within one of the most complex and challenging supply chain environments today.

Here's how TYS can help.

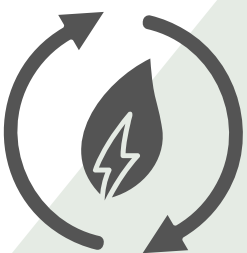

### Aging Infrastructure

#### Challenges

Maintaining aging infrastructure requires a diversified supplier base to provide specialized components and services, which can be challenging to source.

#### How TYS Helps

Discover and onboard quickly to diversify suppliers and mitigate supply bottlenecks.

### Energy Transition & Compliance

#### Challenges

Transitioning to renewable energy sources necessitates significant infrastructure upgrades; the rapidly evolving regulatory landscape requires meticulous compliance management.

#### How TYS Helps

Streamline onboarding & compliance management with pre-qualification tools and continuous monitoring.

### Supplier & Risk Management

#### Challenges

The E&U sectors are facing an increasing frequency of disruption driven by global events such as pandemics, geopolitical conflicts, natural disasters, and cyber-attacks.

#### How TYS Helps

Enhances supply chain resilience with real-time risk insights and proactive management to protect against operational and reputational damage.

Gain Comprehensive Visibility into the supply chain, enabling risk mitigation, compliance assurance, and operational efficiency with Trust Your Supplier.
