The Challenge

❌ **Siloed Data**: Risk & ESG insights are in multiple systems
❌ **Manual Processes**: Slow workflows delay approvals
❌ **Reactive Risk Management**: Gaps in monitoring
❌ **Supplier Verification Gaps:** Incorrect data leads to misidentified suppliers and flawed risk checks

How TYS + EcoVadis Help

Your licensed risk data is only as valuable as how you use it. TYS integrates your licensed data—EcoVadis, or other financial, geopolitical, and compliance licenses — into automated workflows that drive real impact.

Amplify Supplier Intelligence

TYS transforms fragmented data into actionable insights to drive smarter, faster, and more compliant procurement decisions.
