

Strategic Supplier Management

## ABOUT TYS

**Trust Your Supplier** is an innovative supplier information network for managing all aspects of the supplier lifecycle - from discovery and qualification to onboarding and risk monitoring.

## CREATING TRUST

How do you ensure suppliers are compliant & operating responsibly?

### Supplier Discovery & Onboarding

Search, review & invited qualified trusted suppliers

### Global & Industry Standards

Cross-industry standardized questionnaires and workflows

### Compliance & Risk Validators

Integrated risk data sets from authoritative third-parties

### Continuous Monitoring

Automation to ensure supplier risk data is kept up to date with evolving market conditions

### Visualization, Reporting & Audit Management

Perform advanced analytics to better manage onboarding and lifecycle processes

## *Strategic* **Supplier Management**

**Trust Your Supplier** facilitates the ability to react proactively to risky events, preventing reputational damage and creating a resiliency in your supplier management.

## **CREATING VALUE**

Trust Your Supplier gives enterprise organizations the ability to effectively manage and monitor the performance of their broad supplier base.

### **Quality Data**

Suppliers directly provide and maintain their information in a single digital identity for current & accurate data

### **Reduced Cycle Time**

Move quickly through the qualification and verification steps for onboarding suppliers

### **Risk Management**

Integrated risk data sets from third parties provide a holistic view of the supplier in current market conditions

### **Blockchain Security**

Data is secure and immutable from the underlying blockchain technology, which establishes transparency and traceability

### **Integration**

Trust Your Supplier can easily integrate with back office, procure-to-pay, business intelligence, and ERP solutions

### **Collaboration**

Teams from across the organization (Category Managers, Risk & Compliance, Legal, etc.) can rely on this one supplier record, along with multiple data points, for their specific supplier record requirements
